

Account Setup Guide

ShopJayDees Lead Generation System

This guide walks you through setting up the accounts needed for your lead generation pipeline. Each service plays a specific role in finding, qualifying, and reaching prospects.

Once you've completed each step, Cody at SixOhQuad will handle all the technical configuration — connecting the tools, building the agents, and getting the pipeline running.

Questions at any point? Email cody@sixohquad.com

1. ClickUp

What it does: Your central hub — every lead, draft message, and approval lives here. This is where you'll review and approve outreach each day.

Cost: Free plan to start. Paid plans available if you need more features later.

Steps

1. Go to clickup.com and click **Get Started Free**
2. Sign up with your email or Google account
3. Create a new **Workspace** — name it something like “ShopJayDees”
4. Once your workspace is created, invite Cody:
 - Click your workspace name (bottom-left) → **Settings**
 - Go to **People** → **Invite**
 - Enter `cody@sixohquad.com` and set the role to **Admin**
 - Click **Send Invite**

2. Instantly

What it does: Sends your cold outreach emails, warms up your sending address so emails land in inboxes (not spam), and tracks opens and replies.

Cost: Starts at ~\$30 USD/month for the Growth plan.

Steps

1. Go to instantly.ai and click **Start Free Trial**
2. Sign up with your email
3. Choose the **Growth** plan (you can start with the free trial to explore first)
4. Once your account is active, invite Cody:
 - Click the **gear icon** (Settings) in the left sidebar
 - Go to **Team**
 - Click **Invite Member**
 - Enter `cody@sixohquad.com`
 - Click **Send Invite**

Important: Connect a Sending Email Address

You'll need a dedicated email address for cold outreach — don't use your main business email. We recommend creating a new email like `jay@shopjaydees.com` or `hello@shopjaydees.com` specifically for outreach. Cody will help you connect and warm it up once your Instantly account is ready.

3. Hunter.io

What it does: Finds email addresses for decision-makers at the businesses, schools, and teams we're targeting. The pipeline uses it to look up who to contact at each prospect.

Cost: Free tier includes 25 searches/month. Paid plans start at \$49 USD/month if we need more volume.

Steps

1. Go to hunter.io and click **Sign up**

2. Sign up with your email or Google account
 3. The free plan is fine to start — you can upgrade later if needed
 4. Once your account is active, invite Cody:
 - Click your avatar (top-right) → **Team members**
 - Click **Invite a team member**
 - Enter `cody@sixohquad.com`
 - Click **Send invitation**
-

4. Firecrawl

What it does: Scrapes Google Maps to find prospect businesses in your target areas, and pulls information from prospect websites during the enrichment step.

Cost: Free tier includes 500 credits/month. Paid plans start at \$19 USD/month if we need more.

Steps

1. Go to firecrawl.dev and click **Get Started**
2. Sign up with your email or Google/GitHub account
3. The free plan is fine to start
4. Once signed in, share your API key with Cody:
 - Click **API Keys** in the dashboard sidebar
 - Copy your API key
 - Email it to `cody@sixohquad.com` with the subject line “Firecrawl API Key”

Firecrawl doesn't have team invites — sharing the API key is how Cody connects it to the pipeline.

5. Google Cloud

What it does: Hosts the AI agents that run the pipeline and the Gemini AI that writes personalized messages. This is the engine behind the scenes.

Cost: Typically \$2–10 USD/month total (AI usage + hosting).

Steps

This one works a bit differently — Cody will create the Google Cloud project and set everything up. You just need to add your billing information so the (small) monthly charges go to your account.

1. Cody will send you an email invitation to join a Google Cloud project
2. Accept the invitation — you'll need a Google account (Gmail works, or any Google Workspace email)
3. Once you're in, add a billing method:
 - Go to console.cloud.google.com/billing
 - Click **Link a billing account** (or **Create account** if prompted)
 - Add a credit card or payment method
 - Link it to the project Cody shared with you
4. That's it — Cody handles everything else in Google Cloud

If you run into any issues with the billing setup, just forward the screen or error to cody@sixohquad.com and we'll sort it out together.

Checklist

Use this to track your progress. Once everything is checked off, let Cody know and we'll start building.

- ☐ **ClickUp** — Account created, workspace set up, Cody invited as Admin
- ☐ **Instantly** — Account created, Cody invited as team member
- ☐ **Hunter.io** — Account created, Cody invited as team member
- ☐ **Firecrawl** — Account created, API key emailed to Cody
- ☐ **Google Cloud** — Accepted Cody's invite, billing method added
- ☐ **Sending email** — Dedicated outreach email address created (let Cody know what it is)

Once all accounts are set up, email cody@sixohquad.com to confirm and we'll get the pipeline built and running.
